13. Amateur Radio Respect, and Warning

I find it sad that amateur radio operators feel the need to loose respect for each other just because these newsgroups are *mainly* accessed from the internet.

Mention the "internet" aspect of these forums and suddenly people feel it's ok to bash, curse, and make all out war with each other.

I should remind all that these newsgroups are also fed in and out of packet radio BBS stations and read and replied to over RF in nearly all countries utilizing packet BBS's.

Your name calling, cursing and war-ing all go out over the air ways and do nothing to foster and promote the art of amateur radio.

The 'art' of amateur radio?

A bunch of fat, sweaty, socially-maladjusted losers, sitting by themselves in their shacks for hours on end, grousing about how this newfangled interwebnet will never be as useful as the radio they built back in '63 and masturbating furtively over memories of Field Days past?

That's the reality of amateur radio today. As long as there are people like you who continue seeking to use yesterday's technology to solve yesterday's problems, I'll expect more whining along the lines of the above.

Let me spell it out for you: USENET - much like the rest of the Internet - was never intended for transport over amateur radio frequencies. That you (and others) do this is one thing, but pissing and moaning about the content of a medium not covered by FCC or international regulations is, frankly, idiotic on your behalf. Don't like it? Send your own damn traffic out over the airwaves. But don't expect the rest of us to kowtow to your demands.

People wonder why amateur radio is dying. You, my good man, exemplify one reason for that *exceptionally* well.

And, for the benefit of the masses who read USENET via their Icoms, Yaesus, or Kenwoods: FUCK SHIT PISS CUNT DICK BALLS ASS TITS BONER.

73s,

- J.

That was almost a sentence. Keep trying; perhaps you'll get it right
eventually!

Anyway, I now see why you're so deeply concerned about dirty words on
the Internet making it out over the airwaves:

http://groups.yahoo.com/group/BPQ32/message/3118 (May 1, 2010)
http://www.db0anf.de/app/bbs/messages/show-1239_KG6BAJ (May 3, 2010)

As I see it, this leaves you with two options:

- Fix your filters so that they actually work.

- Stop sending USENET posts over the airwaves.

There you go; problem solved.

Also, I'm pretty sure that I forgot to say 'dildo' in my original reply
to you. I'd hate to think that you missed out on my use of the word
'dildo', so here's a use of the word 'dildo' just for you:

DILDO.

Some good points. However, IMHO amateur radio should have no direct
connection to the internet.

Some do. Not all. Not even a significant percentage of all. Myself
excepted.

That is possibly illegal considering you are seemingly not vetting the
content. That would be the equivalent of transmitting porn videos on
70cm ATV and blaming the people who produced the tape/DVD. Moron. I
feel justified on that remark.

Then don't read it, don't transmit it via packet, print it and post it
on telephone poles on the corner, forward it to coworkers......

Get it yet?

How about "airwaves" instead?

What is this thread? Where did it come from, and what is it doing in
rec.radio.amateurs.boatanchors?

We don't care about your packet radio nonsense. If it doesn't have an 807
final at least, it probably doesn't belong in this newsgroup.

I find it sad that amateur radio operators would use packet for usenet traffic.

Sadder yet is the fact that the OP doesn't seem to realize that it's the
responsibility of the control operator of the originating system to make
sure that the traffic is suitable for sending over amateur radio.

And saddest of all is the OP's seemingly random selection of newsgroups,
especially when he chose to identify himself as "no.spam@no.spam."

That should explain things a bit more - it's really sounding like he's spent a little too much time with the TNC. I've seen this happen before when someone doesn't unplug themselves from the shack.

KG6BAJ, if you're reading this, spend some time away from the radios. It'll help to readjust your perspective.

TAPR Hamvention Location

TAPR will be up and at 'em throughout the Hamvention at booths 455-458 in the Ball Arena of the Hara Arena --- same place as last year in the same neighborhood as ARRL and AMSAT

TAPR Digital Forum

Friday May 20, 2011, HARA Arena, Room 1

09:15 AM • Welcome and TAPR Update by Steven Bible, N7HPR

09:30 AM • HPSDR Update by Scotty Cowling WA2DFI

An update on the High Performance Software Defined Radio (HPSDR) project (www.openhpsdr.org). Existing and future projects as well as board availability.

10:00 AM • Griffin: a Whisper and a Chirp by Phil Harman, VK6APH

Griffin is a new HPSDR project that will provide a low power beacon exciter.Covering HF, 6m and 2m, Griffin will generate simultaneous beacons on multiple bands, each modulated independently. Basing Griffin around a large FPGA provides modulation modes such as CW, RTTY, WSPR etc as well as future, as yet unknown modes. An on-board GPS receiver will provide highly accuracy frequency and time control of all beacons. An Ethernet connection will enable remote control and configuration via the Internet. In addition, a revolutionary new beacon mode will enable real time propagation measurement and reporting for all HF and VHF bands.

10:30 AM • CODEC 2 and Open Hardware by Bruce Perens, K6BP

(At the last minute, David Rowe, VK5DGR, had to cancel his trip to Dayton for personal reasons, so Bruce Perens, K6BP, has stepped in to fill the slot.)

TAPR-AMSAT Hamvention Banquet

Friday May 20, 2011, Kohler Presidential Banquet Center, Kettering, OH

Bob Bruninga, WB4APR, will be the after-dinner speaker at the TAPR-AMSAT Hamvention Banquet on Friday evening, May 20, at Kohler Presidential Banquet Center in Kettering, OH just south of Dayton.

Bob's topic is "Power from Space and in Your Shack" (see the abstract below).

"Power from Space and in Your Shack"
By Bob Bruninga, WB4aPR

Last year Solar energy passed from a niche market for greenies to an economic opportunity that beats money in the bank. The monetary return for every dollar on your roof can exceed 10% per year for life which far exceeds the security of any other investment in a bank or our fickle economy. But this economic advantage is overlooked, misunderstood or wasted by many hams because of our warped and twisted prior love-affairs with batteries and generators on which we depend for field-day and emergency power.

To fully grasp today's economics of renewable energy we must learn to completely separate our needs for economical energy 99.9% of the time from our desires for emergency power for only 0.1% of the time. There are economical solutions for both but they are separate and mutually exclusive.

Further, over the last decades there has been a hidden evolution of power supplies in every aspect of our daily lives. Everything we do with energy from our ham shack to our big screen TV depends on this technology but it has also provided us with unbelievable versatility to access power from just about any source from 100 to 240 VAC or 100 to 330 VDC or any voltage down to 12 volts.. Where to find power? Have you

looked on the roof of your house or under the hood of your car recently?

The better that hams understand these subtle evolutionary changes in

energy, the better we are prepared not only for Field Day, for

emergencies but also for the future of our families.

The August 15 deadline for the DCC issue of TAPR's quarterly newsletter,

Packet Status Register (PSR), is coming soon. If you have anything to

contribute to the next issue, please send it to me as soon as you can.

PSR is looking for a few good writers, particularly ham radio operators

working on the digital side of our hobby, who would like to publicize

their activities in the newsletter.

You don't have to be Shakespeare to contribute to PSR and you don't hav
e

to use Microsoft Word to compose your thoughts. We can handle just about

any text and graphic format, so don't be afraid to submit whatever you

have to wa1lou@tapr.org .

Sunday Seminar

Universal Ham Radio Connectivity by Callsign Workshop - Bob Bruninga, WB4APR

With Today's proliferation of wireless electronic devices, we need a
transparent means of providing end-to-end ham radio connectivity for
both text and voice to any ham anywhere using any device and only his
callsign for addressing. Our callsigns are unique in the world. We
should be able to use them for placing a call or text using any system
in real time. The goal of this workshop is to look at the handful of
VOIP and more than 26 different text messaging systems in Ham radio and
see where we can provide transparent connectivity. We invite experts on
all systems to participate and share ideas towards this goal.

Demonstration Room

Be sure to bring your projects to show in the demo room. Even if you are not speaking. Each year at the DCC a separate (and lockable) room is provided for people to bring and show off their latest projects. Tables and power will be provided. Bring your equipment and display for all to see, learn, and ask questions about. Be sure to bring a small sign and/or flyer naming and describing your project.

Saturday Night Banquet Speaker

The Village TELCO - David Rowe, VK5DGR

There are now billions of mobile phones all over the world. However in many developing countries, mobile phones are simply too expensive to use. For example, in a country where people earn $1.50/day, a phone call can cost 21 cents/minute. This is a huge tax on communications.

David Rowe, VK5DGR, will describe how a community of people from around the world set out to fix this problem, using a mix of Wi-Fi and open source software. The result is the Village Telco - a DIY telephone company that anyone can set up.

A Village Telco is constructed from a network of "Mesh Potatoes" - small Wi-Fi boxes that are mounted on homes in a village. They form a mesh network, relaying telephone calls for each other. Each Mesh Potato connects to a regular telephone inside village homes. Phone calls on the network are free. A local person in the Village can be trained in a few hours to set up and maintain the network.

To build the Village Telco we borrowed many ideas from Ham Radio, such as sharing hardware designs and community networks.

The talk will include real world stories of how Village Telcos are helping people in several developing countries, and explain why a simple phone call that we take for granted can be so important.

67. Statewide Nebraska D-Star Emergency Network (was September 2011 Nebraska Section News)

September 2011 Nebraska Section News

Greetings and welcome to Fall!

We are finally making real progress on the Nebraska D-Star Emergency Network. Many of you have heard me talk about this. The idea is to provide a D-Star statewide network to facilitate communications between and among Nebraska's amateur radio emergency communications groups and through them, between county emergency operations centers and the Nebraska Emergency Management Agency. Ten cities are named in the initial phase. The D-Star repeater in Lincoln has been operating now for a few years. This is one of three repeaters purchased by the State through a fortuitous funding opportunity. Since Omaha has a private group supplying a repeater for the system, the additional two units are slated for Grand Island and Kearney. The Grand Island repeater is now up and running. The Omaha repeater is operating at a temporary location. It appears that all the obstacles have been removed to install this repeater on the tallest building in Omaha. We thought we had a site for the Kearney machine, but the deal "fell through" and we are working on a new location. In addition, several counties have purchased D-Star repeaters on their own. These will eventually become part of the state-wide system, at the discretion of the county's emergency management.

Bob Eastwood, W0RJE, is the leader of the D-Star effort. Our technical guru is Myron Coleman, NG0M. In order to get call signs for the machines and to form an organization to support the system, we formed the Nebraska D-Star Club. Bob is president, Myron is VP, I am secretary, and Jon Morris, KA0JGG, is the treasurer. The club held its first full meeting on Saturday, September 24. The club's constitution and bylaws were approved. Nebraska residents who own D-Star radio equipment are invited to be full members of the club. Any amateur, without a D-Star radio, who is interested in D-Star and emergency communications, can be an Associate Member. We formed a Governance Committee consisting of the officers, repeater owners/operators, repeater trustees, and emergency managers for the counties using the statewide system. This committee will set operating policies and help plan the future of the system. Naturally, the Governance Committee will expand as new repeaters are brought online. Trustees, by the way, are volunteers located in the communities housing (or close to) the repeaters.

The repeaters and system are open for use by any licensed amateur radio operator. You do not need to be a member of the club. We are experimenting with a reflector-based linking system called “Nebraska Permalink” which allows automatic linking among the repeaters in the system. So if you make a call in Omaha, your voice will appear in receivers in Lincoln and Grand Island (and any additional repeaters as they become available). Full D-Star functionality is also available which will allow you to talk to D-Star users around the world.

During emergency conditions, however, the system will be restricted to emergency traffic. We are working on a signal or voice loop, etc., to announce that condition. Normal day-to-day amateur communications are encouraged when there is no emergency situation. There is no better way to be sure an emergency resource is working than to use it.

Right now, the systems are linked via the Internet. When it becomes operational, we will move the linking to a new State-owned microwave network. Eventually, we would like to have the D-Star system linked via amateur radio microwave so that we are completely independent of other communications systems. We would, of course, be able to fall back to the state microwave or the Internet.

For more information on the Nebraska D-Star system, please visit: http://www.nedstar.org. This website shows the system status. Eventually users will even be able to configure some of the network functions via this site.

68. Answering a question about D-Star (was Re: Statewide Nebraska D-Star Emergency Network (was September 2011 Nebraska Section News))

Roger Grant, KB0VVD, wrote and asked if storm spotting will still be done on 2-meter FM or if everyone will need to switch to D-Star.

I tried to make it clear in my newsletter and I apologize if I didn't make it clear enough. The Statewide D-Star system is in addition to all that we now do. It offers an additional capability and is not intended to replace our current 2-meter FM activities. The Statewide system gives us the abililty to keep county emergency managers in touch with each other and with the state emergency operations center. It also allows us to coordinate ham radio resources if that becomes necessary. In fact, we will be experimenting with linking FM repeaters into the system.

Some day in the future, digital communcations may replace FM just like SSB replaced AM a few decades ago. But until that time, your VHF and/or UHF radios will continue to be the workhorses in our emergency communications arsenal.

Sorry if I caused any concern.

If you chose to get into D-Star, you are, of course, most welcome to use the system.
